MAJOR AND UPPER-DIVISION REQUIREMENTS

Students should determine their specific program plans with their advisors.

Life Sciences core requirements (~72 units)
• BIOL 005A, 05A, 005B, 005C
• CHEM 001A/1LA, 001B/1LB, 001C/1LC
• Organic CHEM 112A, 112B, 112C
• MATH 008B or 009A, MATH 009B
• PHYS 002A/2LA, 002B/2LB, 002C/2LC
• STAT 040, STAT 110A or PYSC 011
• BCH 100 or 110A

Upper-division requirements (~36-52 units)
• Tier 1 (14 units)
  CBNS 106
  CBNS 120 and 120L or 130L
  CBNS 124
• Tier 2 (20 units for a B.S., 12 units for a B.A.)
  BIOL 178
  CBNS 101, 116, 121 (PSYC 121), 125 (PSYC 125), 126 (PSYC 126), 127 (PSYC 127), 129, 135, PSYC 112, 117, 129
• Tier 3 (18 units for a B.S., 10 units for a B.A.)
  BCH 102, 110B, 110C, 120
  CBNS 108, 150, 165, 169
  CS 170
  PHYS 139L
  PSYC 115, 130, 132, 134, 135
  ANTH 146 (PSYC 146)
  Up to 9 units maximum from:
  CBNS 190, 194, 197, 199

The B.A. requires completion of 4th quarter – level proficiency.

ADVISING

For help in selecting courses, and for information about policies and procedures, contact Professional Academic Advisor Denise Correll in the CNAS Undergraduate Academic Advising Center, 1223 Pierce Hall, (951) 827-1763, denise.correll@ucr.edu, or visit cnasstudent.ucr.edu. Current course requirements are available online in the UCR General Catalog at http://catalog.ucr.edu.

For advice about careers, graduate programs, and letters of recommendation, contact the Undergraduate Faculty Advisor, Dr. Peter Hickmott, in the Department of Psychology, 2111H Psychology Building, peter.hickmott@ucr.edu, (951) 827-7308, or visit neuromajor.ucr.edu.
Neuroscience at the University of California, Riverside

THE INTERDEPARTMENTAL PROGRAM
Neuroscience at UCR is an interdepartmental program with faculty from the Departments of Cell Biology and Neuroscience, Psychology, Biomedical Sciences, Entomology, and Chemistry.

CELL BIOLOGY AND NEUROSCIENCE
The Department of Cell Biology and Neuroscience takes multidisciplinary approaches to understanding basic cellular processes in tissues, as well as more integrative levels of analysis, such as behavior. Some of the areas of study include mechanisms of toxicity, membrane transport, stem cell biology, wound healing, and neurophysiology. The department offers a major in Neuroscience through the College of Natural and Agricultural Sciences and the College of Humanities, Arts, and Social Sciences.

ABOUT THE DEPARTMENT
The department strives for excellence in research, teaching, and public service, and members of our faculty have been recognized in each of these areas. Drs. Michael Adams, Sarjeet Gill, and Manuela Martins-Green have been named Fellows of the American Association for the Advancement of Science. Dr. Maggie Curras-Collazo received the Academic Senate’s Distinguished Teaching Award, the Innovative Teaching Award, and the Distinguished Campus Service Award; Dr. David Eastmond was selected as a Jefferson Science Fellow. Drs. Prue Talbot, Maggie Curras-Collazo, and Glenn Stanley have received awards recognizing their excellence in mentoring undergraduate students.

RESEARCH AND OUTREACH OPPORTUNITIES
In addition to our work with graduate students, Cell Biology and Neuroscience and Psychology faculty members are actively involved in mentoring undergraduates in research. More than 200 undergraduate students have worked in CBNS laboratories in recent years and more than 50 of these students have been co-authors on scholarly publications generated from this research.

Our students are also engaged in outreach activities. For example, for the past several years, Neuroscience students have participated in an annual Brain Awareness Day that increases appreciation, both at UCR and in the community, for the human nervous system and the field of neuroscience.

CAREER PATHS
- Medical, dental, and other health professions. For more information, visit http://hpac.ucr.edu.
- Biotechnology
- Pharmaceutical research
- Environmental health
- Neuroscience and psychology
- Government
- Chemical industry
- Pharmacy
- High school teaching

Students with a talent for science, math, or engineering can translate that ability into a teaching career in California through the California Teach--Science/Mathematics Initiative (CaTEACH-SMI). For more information, visit http://smi.ucr.edu.
